

PRODUCT CATALOGUE 2026

Reusable. Traceable. Built to last.

Post-consumer plastic, transformed into reusable packaging products for global retail brands. Every product is certified, traceable, and embedded with a Digital Product Passport.

- GRS Certified

- PPWR Ready

- Digital Product Passport

ABOUT RECYCLE&GO

We believe every piece of plastic has a second story waiting to be told.

We transform post-consumer plastic waste into reusable, traceable, brand-worthy packaging products for global retail brands — with verified certifications and a Digital Product Passport built into every product from day one.

THREE REASONS BRANDS CHOOSE RECYCLE&GO

Digital Product Passport

Every product carries a verifiable record of its full material journey — from waste collection to your customer's hands. Scan-accessible, audit-ready, and built for the PPWR era.

Verified Materials

Every product we make comes with everything your ESG team needs to measure, report, and evidence your sustainability progress — built in from day one.

Consumer Integration

Products designed for reuse. Each bag becomes a consumer touchpoint — with landing pages that tell the product story and drive engagement with your brand beyond the checkout.

HOW EVERY PRODUCT IS MADE

1

Waste Collected

Post-consumer plastic sourced and logged from verified waste streams

2

Waste Processed

Materials sorted, cleaned, and certified to GRS standards

3

Manufactured

Products made to your specification with passport embedded at production

4

Delivered & Traced

Full chain of custody delivered with every order — scan-ready for consumers

Digital Product Passport— traceability you can show, not just claim

Every product carries a unique Digital Product Passport — a scannable record that traces the material from collection through production to the consumer's hands. No black boxes, no vague claims.
